

TerraNu[®] Technology

SOIL HEALTH IN EVERY GRANULE™

WINTER WHEAT

START YOUR WHEAT OFF STRONG WITH ESSENTIAL N, P, K AND MICRONUTRIENTS

Left: TerraNu Blend Right: Check, no TerraNu

- Carbon-based fertilizer technology that feeds soil biology, enhances nutrient uptake and improves nutrient-use efficiency.
- Improves stand establishment and fall growth.
- Robust overwintering and spring regrowth.
- Improves tillering, increasing yield potential.
- User-friendly: easy-to-apply and blends well with other dry fertilizers.
- **TerraNu Ignite™** — is your high NPK plus complete macro- and micronutrient package for your high-yielding winter wheat.
 - **Don't forget about micronutrients.**
 - Soil health, NPK and sulfate-based micronutrients are instrumental for the performance and quality of your wheat crop.
 - Improved distribution, resulting in more root feeding sites and better nutrient uptake.

Winter wheat field in Owendale, MI with a TerraNu blend at an application rate of 250 lbs/acre.

Product	Rate	Application Timing	Application Method
TerraNu Ignite	200-250 lbs/acre	<ul style="list-style-type: none"> ▪ fall pre-plant ▪ at seeding 	<ul style="list-style-type: none"> ▪ broadcast ▪ in blends ▪ air seeder

Work with your consultant or agronomist to find the application timing and methods that work best for you.
